EDUCATION

SRM Institute of science and technology

Chennai, Tamil Nadu

Bachelor of Technology in Computer Science with specialization in AIML, Current SGPA: 9.45, CGPA: 9.15

SKILLS SUMMARY

Languages : Python, Basics of Java, SQL, C, DBMS, OOPS

Frameworks : NumPy, Pandas, Scikit-Learn, Matplotlib

Tools: Excel, PowerPoint, Flask, MySQL, SQLite, Git, GitHub

Platforms: PyCharm, Jupyter Notebook, Visual Studio Code, Intellij IDEA

Soft Skills: Rapport Building, Strong Stakeholder management, People management, Excellent communication

WORK EXPERIENCE

AI INTERN | CODSOFT VIRTUAL INTERNSHIP | 06/2025 to 07/2025

- Gained hands-on exposure to industry-standard software development practices, cloud computing concepts, and GitHub collaboration workflows
- Built a capstone project demonstrating the integration of Amazon Web Services
- Participated in coding challenges and real-world tech scenarios, improving practical skills in full-stack development and teamwork

PROJECTS

Protein Data Analysis Using Machine Learning and Explainable AI

- Analyzed protein sequence data using Python, ESM-2 embeddings, and machine learning to identify patterns and generate predictions.
- Applied SHAP for model interpretability and protein annotation tools to understand protein functions and biological pathways.

Multimodal Emotion Detection system with reliability fusion and sentiment analysis chatbot

- Designed and implemented a multimodal emotion recognition system leveraging fusion strategies across visual, textual, and audio data for robust and accurate predictions.
- Engineered an intelligent chatbot using sentiment analysis to detect user emotions and deliver personalized, context-aware conversational responses.

Diabetic Retinopathy detection using Deep learning

- Developed a DL model using CNN to classify retinal images for early detection of diabetic retinopathy
- Achieved accurate prediction by training on medical image datasets and implemented image preprocessing techniques for improved model performance.

CERTIFICATES

Python for Data Science, AI & Development | IBM

- Learned Python fundamentals, including variables, data types, control structures, functions, loops, and data structures.
- Explored Python applications in data science and AI development

AWS Cloud Practitioner Essentials | AWS

- Learned fundamental data structures and algorithmic problem solving techniques
- Practiced implementing algorithms using time and space complexity analysis

SQL for Data Management | Oracle Academy

- Developed skills in writing SQL queries for data retrieval and manipulation
